

Head of Safety Products

COMPANY:

Paris based Safety Line offers digital solutions that enable airlines and airports to leverage existing data for safer and more efficient operations. The combination of a solid expertise in aviation associated with patented research in data science applications allows Safety Line to offer uniquely innovative solutions, including:

- **SafetyCube**, an integrated compliance, safety, and risk management solution for aviation based on a dynamic BowTie approach
- **AirsideWatch Analytics**, a digital solution allowing to improve Airside efficiency by leveraging unprecedented analytics from ground radar data
- **OptiFlight - In-flight guidance**, the only flight efficiency solution allowing airlines to optimize all flight phases including climb thanks to machine learning performance models, accurate 4D weather forecasts, and customized recommendations issued to pilots for each flight

The Company headcount is currently 25 and is increasing to cope with rapid growth.

MISSION:

Safety Line has developed since 2012 a Safety and Compliance Management Software for the aerospace industry (SafetyCube for Airlines, Airports, MRO, OEM, ANSP...) to provide a practical solution for the operators having to comply with the new Safety Management System's ICAO regulation. This software is the only one that has been specifically designed for this purpose and is based on the main industry standards for Risk and Safety (BowTie, ADREP, etc.). It has to date more than 40 customers, among them Airbus Helicopters and Aéroports de Paris. The mission will be to manage the business unit and lead its growth:

- ✘ Manage the strategy to increase the number of customers (with the support of the Sales department)
- ✘ Responsible for the Business Line's P&L
- ✘ Provide and organize professional services to help the customers setting up the software and using it in an efficient way
- ✘ Supervise the Customer's Experience in coordination with the Customer Support team (mainly aerospace engineers)
- ✘ Manage the evolution of the software to match the needs of the customers and participate to the development cycle of the product.
- ✘ Act as the Product Owner and synchronize with the support and development team

SKILLS AND EXPERIENCE:

- ✘ Aerospace engineer or a Master degree in Aerospace
- ✘ Experience of at least 5 years in Safety, Quality and Compliance in Aviation
- ✘ Thorough knowledge of one of the following aviation business : airline, airport, ANSP
- ✘ Risk management skills and human factors
- ✘ Good management skills
- ✘ A good taste in Digital Solutions, being able to craft new software specifications
- ✘ Dynamic, willing to work in a start-up environment with challenges
